mr_ped wrote on Tue, 29 July 2008 11:43 Under MINGW with -Wall I do get also:
C:\upp\uppsrc\Core\dli.h:1: warning: ignoring #pragma BLITZ_APPROVE
I think I can safely comment it out by "///" to make the warning vanish, and the BLITZ will find it, but
I wonder why this one remained uncommented. Is dli.h generated, or it just escaped the hunt for
BLITZ_APPROVE pragma?

Correct, thanks.

Mirek
