aldeacity wrote on Mon, 04 August 2008 16:23Ok... Thanks a lot. I'll do it. But, I don't use Windows Vista, so I use WXP.
Juan.
Not a problem, AFAIK all you have to do is uncheck some items in setup to get rid of the Vista stuff. Even if you install all on a XP, you can still build and debug just fine, but you'll get a lot of stuff you may no need on your disk, like .NET tools.
