Grid now supports summary row:

To enable summary:

grid.SummaryRow();

Auto calculations:

grid.AddColumn("Price").DoSum("Total %` $");
grid.AddColumn("Length").DoMin();

Manual modifing of summary fields:

grid.SetSummary(5, "Min size: 10");
grid.SetSummary(TOTAL, "Total: 200.23");

Retrieving summary fields:

Value min = grid.GetSummary(5);
Value total = grid.GetSummary(TOTAL);

There is also a new callback WhenUpdateSummary called on appending, updating and removing rows.

This update will be commited when I finish cell popups.

PS: I remeber all grid requests. They're just waiting in queue
