Subject: Re: OleCalc from examples - can't register OCX
Posted by qapko on Fri, 08 Aug 2008 10:44:59 GMT

Thank you very much
It was this typo in calc.rc. Before reporting the problem I actually removed all generated files in OleCalc directory and then regenerated them again so in my case calc.tlb was OK.
Once more, thank you for your attention.

Gabi
