I'm really only posting this so that I don't have to remember to re-make the change myself.

The problem is that the EditIntSpins for RGB/HSV are too narrow to display 255 correctly. Fixed layout:

```
LAYOUT(PaletteLayout, 216, 332)
```

```
ITEM(TabCtrl, palette_tab, HSizePosZ(4, 4).VSizePosZ(4, 82))
```

```
ITEM(Label, dv___1, SetLabel(t_("Color:")).LeftPosZ(4, 36).BottomPosZ(52, 24))
```

```
ITEM(DataPusher, color, HSizePosZ(68, 32).BottomPosZ(54, 22))
```

```
ITEM(Button, set_transparent, RightPosZ(4, 18).BottomPosZ(56, 18))
```

```
UNTYPED(fetch_color, RightPosZ(4, 18).BottomPosZ(30, 18))
```

```
ITEM(Label, dv___5, SetLabel(t_("R:")).LeftPosZ(4, 12).BottomPosZ(29, 19))
```

```
ITEM(EditIntSpin, r, LeftPosZ(16, 44).BottomPosZ(29, 19))
```

```
ITEM(Label, dv___7, SetLabel(t_("G:")).LeftPosZ(72, 12).BottomPosZ(29, 19))
```

```
ITEM(EditIntSpin, g, LeftPosZ(84, 44).BottomPosZ(29, 19))
```

```
ITEM(Label, dv___9, SetLabel(t_("B:")).LeftPosZ(136, 12).BottomPosZ(29, 19))
```

```
ITEM(EditIntSpin, b, LeftPosZ(150, 42).BottomPosZ(29, 19))
```

```
ITEM(Label, dv___11, SetLabel(t_("H:")).LeftPosZ(4, 12).BottomPosZ(5, 19))
```

```
ITEM(EditIntSpin, h, LeftPosZ(16, 44).BottomPosZ(5, 19))
```

```
ITEM(Label, dv___13, SetLabel(t_("S:")).LeftPosZ(72, 12).BottomPosZ(5, 19))
```

```
ITEM(EditIntSpin, s, LeftPosZ(84, 44).BottomPosZ(5, 19))
```

```
ITEM(Label, dv___15, SetLabel(t_("V:")).LeftPosZ(136, 12).BottomPosZ(5, 19))
```

```
ITEM(EditIntSpin, v, LeftPosZ(148, 44).BottomPosZ(5, 19))
```

```
END_LAYOUT
```
