Well, I will be happy to help for the Linux port (rpm mainly)

Hello, you are WELCOME!

Right now we are setting new "infrastructure" server, basically ubuntu 8.04 / amd64. Do you think it will be possible to release .rpms on it (as e.g. nightly-builds)?

Mirek

I will start another thread about rpm building. I don't want to flood this thread.

New Ubuntu servers? Cool. And what do you think about my ideas, I mean the web site design (not the rpm easy construction ?
