Subject: Re: U++ 2008.1 rpm
Posted by amrein on Sun, 17 Aug 2008 02:57:04 GMT

I need to generate GCC.bm for the rpm package as there is no .bm included in the tarball. Which configuration do want you me to use?

I'm asking this because ChkSupp() from uppsrc/ide/Install.cpp (line 254) search for GCC.bm and TheIDE won't work correctly without it.
