Quote:What is the benefit of having a GNU or OSI approved license?

Advocacy and recognition, applying for grants given to free software projects, Google SOC and others like it, free versions of open source based enterprise software (Ie. Collaboration software like launchpad and others), other free services given to open source efforts (Ie. Coverity), participation in Open Source conferences, eligibility for Open Source awards (cash or recognition)...

Many benefits, just have to keep an eye open to them.
