Subject: Re: What license Ultimate++ should use? Tell us!!!
Posted by bytefield on Wed, 27 Aug 2008 06:19:16 GMT

I know that Upp license is a solved issue but i want to know what others think about Boost license.
For me it seems almost similar with BSD license...
The part which i don't understand is that:
Quote:... and to permit third-parties to whom the Software is furnished to do so, ...
that means that my executable and future derivations from that software to be covered by Boost license? Someone please enlighten me.
