captainc wrote on Wed, 27 August 2008 12:43No problem, more to come soon. Good job on the automatic updating of the site too. One thing I think would be really useful is web interface like the one from gotapi.com where you have the tree-view list on the left with a search and the documentation in the main content area. It allows for easy navigation.

Well, uppbbox/upppwww is all yours

Mirek
