Subject: Can not get a double from database

Hi,
I am trying to get a double (I think) from a sqlite3 database but I see a bad number. Ints and Strings no problem.
Here the code:

```
if(!SQL.Execute(Format("Select sum(ammount) from Pags where Num_Cli_Pag=%d",nNumCli)))
 {
  PromptOK("Error!");
 }
 if(!SQL.Fetch())
 {
  edDeb.SetData("0");
 }
 else
       {
    double d=(double)SQL[0];
    strTemp=Format("%f",d);
    edDeb.SetData(strTemp);
       }
```

What am I doing wrong?

Thank you

Alex
