Because this doesn't work:

```
#include <CtrlLib/CtrlLib.h>
```

```
GUI_APP_MAIN
```

```
{  
  TopWindow w1;  
  TopWindow w2;  
  w1.SetRect(0,0,200,200);  
  
  w1.Open();  
  w1.Title("w1").Run(); //Activate() doesn't help either...
```

```
  w2.Open();  
  w2.Title("w2").Run();  
}
```
