ok, I need something like this:

```
#include <CtrlLib/CtrlLib.h>
```

```
GUI_APP_MAIN
```

```
{  
    TopWindow w1main;  
    TopWindow w2;  
    TopWindow w3;  
  
    w1main.SetRect(0,0,100,100);  
    w1main.OpenMain();  
    w1main.Title("w1main").Run();  
  
    w2.SetRect(200,200,200,200);  
    w2.Open(&w1main);  
    w2.Title("w2").Run();  
  
    w3.SetRect(400,400,300,300);  
    w3.Open(&w1main);  
    w3.Title("w3").Run();  
}
```

How to make it work?
