ok, I need something like this:

```
#include <CtrlLib/CtrlLib.h>
```

```
GUI_APP_MAIN
```

```
{
```

```
TopWindow w1main;
```

```
TopWindow w2;
```

```
TopWindow w3;
```

```
w1main.SetRect(0,0,100,100);
```

```
w1main.OpenMain();
```

```
w1main.Title("w1main").Run();
```

```
w2.SetRect(200,200,200,200);
```

```
w2.Open(&w1main);
```

```
w2.Title("w2").Run();
```

```
w3.SetRect(400,400,300,300);
```

```
w3.Open(&w1main);
```

```
w3.Title("w3").Run();
```

```
}
```

How to make it work?
