Subject: Win32 sample has error [BUG] Posted by amando1957 on Wed, 10 Sep 2008 11:21:45 GMT

View Forum Message <> Reply to Message

Hi folks,

Im using 2008.1 at WIN2K. I have tried the Win32 sample again (Win32 API project(no U++)), but does not run as it did not in version 2007.

If you click the menu item "Setup / Be verbose" and then run it, you will find the single error:

Error executing C:\upp\mingw\bin\windres.exe -i "C:\MyApps\uWin32_t\uWin32_t.rc" -o "C:/upp/out/uWin32_t/MINGW.Debug_full.Gui.Main\uWin32_t\$rc.o" --include-dir="C:\MyApps" --

So "uWin32_t.rc" seems to be an res-file, maybe that's it?

I have also commented on top like this: #include <windows.h> //#include "resource.h"

but did not help.

Somebody knows what to do? kind greets
Martin
