Hello all

Trying to compile the AllForI18n I have got an error. To know the reason I also tried to compile the SQL_MySql basic sample and I have got the same compiling error:

C:\upp\uppsrc\MySql/MySql.h(44) : error C2143: syntax error : missing ';' before '*'

Next is the code in MySql.h:

```
class MySqlSession : public SqlSession {
public:
 virtual bool          IsOpen() const;
 virtual RunScript     GetRunScript() const          { return &MySqlPerformScript; }
 virtual Vector<String> EnumUsers();
 virtual Vector<String> EnumDatabases();
 virtual Vector<String> EnumTables(String database);

protected:
 virtual SqlConnection *CreateConnection();

private:
 MYSQL *mysql; <<-- Here is the error(line 44)
```

It seems like MYSQL symbol is not right.

Best regards
Koldo
