Hello all

Trying to compile the AllFor18n I have got an error. To know the reason I also tried to compile the SQL_MySql basic sample and I have got the same compiling error:

C:\upp\uppsrc\MySql\MySql.h(44) : error C2143: syntax error : missing ';' before '*'

Next is the code in MySql.h:

```
class MySqlSession : public SqlSession {
public:
    virtual bool      IsOpen() const;
    virtual RunScript  GetRunScript() const      { return &MySqlPerformScript; }
    virtual Vector<String> EnumUsers();
    virtual Vector<String> EnumDatabases();
    virtual Vector<String> EnumTables(String database);
```

protected:

```
    virtual SqlConnection *CreateConnection();
```

private:

```
    MYSQL *mysql; <!-- Here is the error(line 44)
```

It seems like MYSQL symbol is not right.

Best regards

Koldo
