Hello all

Trying to compile the AllForI18n I have got an error. To know the reason I also tried to compile the SQL_MySql basic sample and I have got the same compiling error:

C:\upp\uppsrc\MySql\MySql.h(44) : error C2143: syntax error : missing ';' before '*'

Next is the code in MySql.h:

```
class MySqlSession : public SqlSession {  
public:  
    virtual bool      IsOpen() const;  
    virtual RunScript  GetRunScript() const          { return & MySqlPerformScript; }  
    virtual Vector<String> EnumUsers();  
    virtual Vector<String> EnumDatabases();  
    virtual Vector<String> EnumTables(String database);  
  
protected:  
    virtual SqlConnection *CreateConnection();  
  
private:  
    MYSQL *mysql; <<-- Here is the error(line 44)
```

It seems like MYSQL symbol is not right.

Best regards

Koldo
