Subject: Re: RSS Parser/Composer Class For U++
Posted by Oblivion on Sat, 13 Sep 2008 19:48:13 GMT

I've corrected some small bugs, and cleaned up the example code a bit (I think it's completely readable now). Also I have added a simple "RssView" application. This is only a modification of the "XmlView" example. It acts the same way, but only for parsing Rss files.

Also I have supplied some simple rss feed files (which can be also downloaded at:

http://cyber.law.harvard.edu/rss/rss.html

ps. Updated souce code of the Rss class is on the first post of this topic.

Regards.
