---

I am tryng to modify the USQLexample in the same way I would like to add a richtTextCtrl to act as modifier of a WHO BORROW field in the borrowed table  
Please jaynorwood cand you post your code example for a newbie ?  
My goal is to make this field in the table bigger in capacity and to edit it with an RichTextCtrl outside of the gridCTRL to display and edit this field in the table BORROWED.  
thanks in advance
