Subject: UBUNTU 8.04 - /init: /init: 1: cannot open /dev/root: No such device or address
Posted by forigato on Wed, 24 Sep 2008 12:45:39 GMT

Hello All,

I was presented with a busybox shell. Error messages on boot include:

"Begin: Mounting root file system... ...
Begin: Running /scipts/local-top ...
Done.
/init: /init: 1: cannot open /dev/root: No such device or address
Begin: Running /scripts/local-premount ...
Done." ...
"Target filesystem doesn't have /sbin/init"
