Hi,
I am trying to make a "Wait a moment, please..." dlg that is shown while computation is running.
When computation finish the dlg must be closed automatically.
So, I used a modal dlg and in the contructor i have the following code:

```
ConstructorMethod
{
  ...
  executeAlgorithm();
  Close();
}
```

But the dlg never closes... As it as a close button if I click it the dlg closes.

Any ideas?

Alex
