luzr wrote on Fri, 26 September 2008 08:01 You mean those blue lines in RichEdit? Those are not printed - this is just information for you while editing.

If not blue lines, sure, you can set everything to zero. There is even special command '~' to do that. See QTF reference.

Mirek

Thanks,

that sign delete everything, so to preserve the outer border I needed another external table without '~'.

Luigi
