sergeynikitin wrote on Tue, 19 February 2008 08:53Thank you. I used the same way. I have created a style, named Landscape in QTF-document, and using the availability of this style as an indicator of a turn the page.

Prevet Sergey,

I am having the same problem: I need to save a qtf document with landscape orientation. Can you make available the modification you have done?

Thanks,
Luigi
