fudadmin wrote on Thu, 23 March 2006 12:34Is LineEdit the main normal text edit control? And if yes, then how to set normal fonts in a normal way?

P.S.

Font f=Arial(12);
line_edit.SetFont(f);

gives something horrible...

There are two:

LineEdit is non-proportional line oriented text editor. That is why using Arial is not a good idea there....

DocEdit is paragraph oriented proportional. My guess is that it is what you are seeking for.
