```
Button::Style& ImageStyle()
{
    static Button::Style s = Button::StyleNormal();
    s.look[0] = imgs::kkk;
    s.look[1] = imgs::kkk;
    s.look[2] = imgs::kkk;
    s.look[3] = imgs::kkk;
    s.pressoffset = Point(1, -1);
    return s;
}
```

```
btn_download_all.setStyle(imgsty);
```

SetStyle only stores a pointer.
