Mindtraveller wrote on Sat, 11 October 2008 22:36Here are these files: ConveyorThread.h & RS232Thread.h
You should use RS232Thread class.

Kran.h & main.cpp are files from sample project which uses RS232Thread class.

Currently I`m writing manual for RS232Thread. It will be ready within some days. Hope it will answer your questions.

Hi Pavel,

Is it possible to have even the Kran.lay file in order to have a working example? The file with extension .iml I suppose is not important.

Thanks a lot,
Luigi
