But Mjrt has valid point about how it works right now, but I think the trailing slash should be handled as well.

```
String DirectoryUp(String& dir, bool basedir)
{
    while(*dir.Last() == '\\' || *dir.Last() == '/')
        dir.Trim(dir.GetCount() - 1);
    String s = dir;
    String name;
```

Like this?
