Subject: TheIDE slows down on Help switching

I don`t know if it is a bug or anything to optimize but sometimes it`s little annoying. While editing code (about 17 tabs open) I press F1. After approx 1 second code becomes grayed (syntax highlighting is switched off), and help tab is opened. On pressing F1 again, I have approx 1.5 sec delay and code tab is activated. All these delays make CPU load about 90%.

CPU: AMD, 2.1 GHz (1 core)
OS: WinXP SP2
TheIDE: 810.r165
