Hi,

when I try to compile my program with a fresh copy of U++ svn and an up-to-date Ubuntu 8.10 with gcc-4.3 I get the following error in release mode:

/home/christian/Desktop/upp/uppsrc/Core/Stream.cpp:1306:

open with O_CREAT in second argument needs 3 a
 rguments

Here you can find more infos: https://wiki.ubuntu.com/CompilerFlags#-D_FORTIFY_SOURCE=2
I don't know which flags are needed so I just point you in the right direction.
