unodgs wrote on Mon, 20 October 2008 08:22I think it would be nice to add to SqlId interface overloaded [] operator:

SqlCol operator [] (const SqlId& id) const;
which let us to write

Select(ID, CUSTOMER[NAME], PRODUCT[QUANTITY])...

insead of

Select(ID, NAME.Of(CUSTOMER), QUANTITY.Of(PRODUCT))...

What do you think?

Well, it felt a bit weird at first, but after a bit of thinking, I think this is quite natural.

Added. (And sorry for the delay, T++/A++ is really driving me insane
