tojocky wrote on Mon, 03 November 2008 02:19: Is a problems with svn 589 on win32 xp when i edit topic (.tpp). The file "all.i" from folder <name>.tpp do not created after edit topic. For example look package "PieTest" from bazaar.

You have to explicitly activate this feature - right click on .tpp group and select "Includeable".

(The reason is that such .tpp eats significantly more memory now and it is only needed for .tpp containing app doc resources).
