Hello!

I think that file Core/OI\_Set.cpp wich contain:

```
##BLITZ_PROHIBIT

#ifndef flagNONAMESPACE
namespace Upp {
#endif

void Set__(volatile bool& b)
{
//WriteMemoryBarrier should be here
b = true;
}

#ifndef flagNONAMESPACE
};
#endif
```

will be great to change in this:

```
##BLITZ_PROHIBIT

NAMESPACE_UPP

void Set__(volatile bool& b)
{
//WriteMemoryBarrier should be here
b = true;
}
```

END\_UPP\_NAMESPACE

Now, the functionality is identical, but in future when will need to add changes, will be great to change only Core.Core.h!
