Subject: Refresh Layout
Posted by sapiency on Wed, 12 Nov 2008 22:05:26 GMT

Hi,

I start searching for devices from a menuitem. All founded devices are insert in a devicetree.

Actually the tree refresh when I move the mouse over the tree, but it would be nice to see all the devices which where found without user action.

I tried Refresh[...]() in the method where the elements are insert into the tree but it does not work as I expect ...

Any idea for a solution?

regards

reinhard
