amando1957 wrote on Sat, 15 November 2008 07:45 But makes a transparent window now:  
The desktop is being copied each time it gets the focus, looks like:

Dealing with focus I have found these, but cannot make sense from them:

```
void TopWindow::ActiveFocus0(Ctrl& ctrl)
void TopWindow::Activate()
```

Not to guess, as its not a child:  

```
void TopWindow::ChildGotFocus()
```

Made a separate test case, but it did not repeat, there I got the expected grey window.

Martin

IMO, event loop is not running.

Mirek
