amando1957 wrote on Sat, 15 November 2008 07:45But makes a transparent window now: The desktop is being copied each time it gets the focus, looks like:

Dealing with focus I have found these, but cannot make sense from them:

void TopWindow::ActiveFocus0(Ctrl& ctrl)

void TopWindow::Activate()

Not to guess, as its not a child: void TopWindow::ChildGotFocus()

Made a seperate test case, but it did not repeat, there I got the expected grey window.

Martin

IMO, event loop is not running.
