Subject: Re: Docking package (plus examples)
Posted by Novo on Sat, 22 Nov 2008 17:34:49 GMT

I checked DockCtrl (by Ismail Yilmaz) + Vista + disabled "Show window contents while dragging" + MSVC71/MSVC9.

Docking with mouse is working fine. I couldn't find any difference between MSVC71 and MSVC9.

There are currently only two problems with DockCtrl:

1) DockCtrlExample crashes during docking a control as a tab;
2) Closing a tab (by pressing a close/cross button) causes assert in DockCtrlExample;

Problem (2) happens in Docking package too. But in this case application just crashes.

I wonder if it is possible to make at least one stable docking control/package?

Sorry for being annoying.
