captainc wrote on Fri, 21 November 2008 18:04What kind of use cases store images in sql relational databases?

In this case, pictures of employees

Anyway, I always like to store raw data (like images or long documents) into central database. I removes at least two maintainance variables

- stored in DB, I do not need predefined network path

- DB is backuped, I need not to worry about separate backup or about restoring the same snapshot of files and DB data
