Oblivion wrote on Sun, 23 November 2008 16:38If possible, could you give some details about the assert?

Hi Oblivion,

DockCtrlExample + Vista + disabled "Show window contents while dragging" + MSVC71/MSVC9 + SVN rev. 671 + Debug configuration, of course.

Just launch DockCtrlExample and try to close "Dock 4".

DockTabs.cpp line 436. This is a call to WhenActive() in method TabInterface::LeftDown(). Assert happens in Vector::Get(int i). Variable "active" is zero.

I'm also getting memory access violation when trying to dock "Dock 5" control into "Dock 2" control. It happens in Ctrl.cpp line 258, method Ctrl::IsVisible(). It is called from CtrlDraw.cpp line 43 (Ctrl::Refresh()), which is called from DockableCtrl.cpp line 192, DockableCtrl::WindowProc().

I hope that helps.
