Hello

Here is very simple example of dice combined with parser. Parameters of dice can be changed by right click menu.

1D6 == throw with one 6 sided dice (output in range 1-6)

2D9 == throw with two 9 sided dices (output in range 2-18)

you can specify more complex rules: $\text{abs}(1\text{D}6 - 1\text{D}6)\text{D}20/5$ or $1\text{D}9 * 10 + 1\text{D}9$

It is only on your imagination.

/radek

p.s.

Any feedback or suggestion is welcome.
