Quote:Yeah, but what is the difference?
If it is text I can open it with the editor, otherwise not.

Actually, only as long as "editor" is notepad.exe. Other editors (including everything in U++) are able to deal with just '\n' instead of "\r\n" just fine.

BTW, U++ policy is to generate "\r\n" on output (but with the code) and ignore '\r' on input...

Mirek
