Hi,

I have successfully managed to get TheIDE running on OpenBSD 4.4 (patch attached). Problems are expected with older versions due to compiler restrictions.
See topic
http://www.ultimatepp.org/forum/index.php?t=msg&th=1954& amp;start=0&
for related problems.

I have introduced an OPENBSD and BSD flag in preparation for additional supported BSDs. Another change is to use sh instead of bash when running compiled program from within TheIDE since this should be supported on all *nix platforms.

Also, changed deduction for number of processors in Cpu.cpp to be the same for supported BSDs.

Attached patches should be applied against latest release 2008.1.

Matthias
