cocob wrote on Sat, 06 December 2008 11:47Do you mean that we will able to build upp with other compiler than GCC ?

cocob

Is there any widely used compiler other than GCC?

Anyway, seriously, I guess we will start with GCC, but I believe we can eventually gradually add support of other compilers.

IMO, if you have working Makefile, you can use bash script, awk and sed and change it to work with other compiler.
