sergeynikitin wrote on Sat, 29 November 2008 10:08I try use GridCtrl with MySQL. On number
column sorting work fine, but on String columns sorting very strange. How to setup right collating
sequence in GridCtrl. Please Help
What you mean exactely. GridCtrl just uses Value comparator. So if value is String - String
comparator will be used, if value is WString - WString comparator will be used and so on.
