Hi,

I just tried to include a DropList in a Toolbar and started with the example on the page and modified it.

It place the Droplist in the bar, but it's only shown as a small line.

```
struct MyApp : TopWindow {

typedef MyApp CLASSNAME;
    DropList dl;
    Toolbar tb;

    MyApp()
    {
AddFrame(tb);
tb.Set(THISBACK(createTool));

        //Add(dl.HSizePos().TopPos(5, Ctrl::STDSIZE));

        dl.SetDisplay(Single<FontFaceDisplay>());

        for(int i = 0; i < Font::GetFaceCount(); i++)

            dl.Add(i);

        SetRect(0, 150, 200, 170);

    }

    void createTool(Bar & bar){
        bar.Add(dl.HSizePos().TopPos(5, Ctrl::STDSIZE));
    }

};
```

where is my mistake?

reinhard
