Hi,

I just tried to include a DropDownList in a Toolbar and started with the example on the page and modified it.

It place the Dropdownlist in the bar, but it's only shown as a small line.

```
struct MyApp : TopWindow {
```

```
typedef MyApp CLASSNAME;
```

```
    DropDownList dl;
```

```
    ToolBar tb;
```

```
    MyApp()
```

```
    {
```

```
        AddFrame(tb);
```

```
        tb.Set(THISBACK(createTool));
```

```
        //Add(dl.HSizePos().TopPos(5, Ctrl::STDSIZE));
```

```
        dl.SetDisplay(Single<FontFaceDisplay>());
```

```
        for(int i = 0; i < Font::GetFaceCount(); i++)
```

```
            dl.Add(i);
```

```
        SetRect(0, 150, 200, 170);
```

```
}
```

```
    void createTool(Bar & bar){
```

```
        bar.Add(dl.HSizePos().TopPos(5, Ctrl::STDSIZE));
```

```
}
```

```
};
```

where is my mistake?

reinhard
