Code of function

```
int Age(Date date1, Date date2) {
    Date date_t;
    if (date1 > date2) {
        date_t = date2;
        date2 = date1;
        date1 = date_t;
    }
    if (date2.month > date1.month) return date2.year - date1.year;
    else if (date2.month < date1.month) return date2.year - date1.year - 1;
    else if (date2.month == date1.month) {
        if (date2.day >= date1.day) return date2.year - date1.year;
        else if (date2.day < date1.day) return date2.year - date1.year - 1;
    }
    return -1;
}
```
