tojocky wrote on Tue, 16 December 2008 10:34May be:

int AgeYears(Date date1, Date date2) {
 int sign=1;
 if (date1 > date2) sign = -1;
 int age_years = sign*(date2.year - date1.year);
 int month_dif = sign*(date2.month - date1.month)
 if ((month_dif < 0)||((month_dif == 0)&&(sign*(date2.day - date1.day) < 0))) age_years--;
 return age_years;
}

?

Maybe. It doesn't matter. Last time I use this function anywhere.
This function very is often used.

So it was a request to the developers of inclusion in the assembly.
