I'm using the following code to query my database:

```
Sqlld count("COUNT(*)");
sql * Select(count).From(sqlTable).Where(PRODUKT=="prohibis");
```

sqlTable is a String. How do i use these String as a Sqlld? I get the following errors when compiling:

```
G:\Entwicklung\UPP\prohibisZA\prohibisZA.cpp(1048) : error C2679: binary '=' : no operator found
which takes a right-hand operand of type
```

```

```

```

```

I get no errors when i replace the String sqlTable with the Sqlld KUNDEN which i defined in the schema-file:

```
sql * Select(count).From(KUNDEN).Where(PRODUKT=="prohibis");
```

How can i convert my String sqlTable into a Sqlld?
