Subject: Re: Issue with getting data back from a sqlite3 database
Posted by BioBytes on Sun, 28 Dec 2008 08:22:40 GMT

Thank you for your advice,

I still got an error "assertion failed : NULL != stmt". I think the syntax of my sql query is not correct. When I check if the base is open, I get true response as well as false when I close the sqlite file "DeepSkyDB".

Please what do you mean by UPP way ? I am a newbie for connecting databases with UPP.

Thanks for your reply

Kind regards
Biobytes
